

Peak One Stove Guidelines

Stoves to be used under close supervision by adult.

1. Handling Fuel
 - Transport fuel in bottles designed for that purpose.
 - Red bottles preferred.
 - Best if marked "fuel".
 - Adults handle fuel.
 - Stove must be cool before filling.
 - Do not overfill. Stove needs some air in tank to run properly.
 - Fill stove with filler cap or funnel designed for that purpose.
 - Wipe excess fuel from hands, fuel bottle, and stove before storage or use.
 - Store fuel at least six feet from stove.
2. Lighting
 - Clear area of burnable debris.
 - Set stove on firm level surface.
 - Pressurize tank. (25 pumps)
 - Keep face, hands away from area directly above burner.
 - Light match
 - Turn to HIGH/LIGHT (stove lights)
 - Pump 30 times.
 - Adjust the flame to desired level.
3. Storage
 - Allow stove to cool completely.
 - Fold legs and place stove in case.
 - If stove is to be stored for extended period remove fuel from tank.
4. Maintenance
 - Clean
 - Add drops of oil in pump cap each trip.
